When considering breast augmentation surgery, it is important to consult with a surgeon who has the training, skill and experience necessary to provide you with a beautiful and natural result. Dr. Balogh has an impeccable reputation, and has performed numerous breast augmentation surgeries in her Vienna practice. In every breast augmentation procedure that Dr. Balogh performs, her goal is to provide the most proportional, natural-looking results possible while considering the patient's desired outcome and concerns.

There are many reasons women consider having breast augmentation surgery. Some women are tired of never having clothes that fit appropriately, while oth-

ers after substantial weight loss or babies have lost the volume in their breasts. Breast augmentation surgery involves using breast implants to increase the size of your breasts or restore breast volume that has been lost after weight loss or pregnancy.

**Emphasis on information and dialogue**  
"I place great emphasis on providing information and educating my patients on their choices and specialised treatments. This is done with information sheets, educational resources and personalised sketches. The patient also sees pictures of other anonymous patients who underwent the same procedure. This thorough and individualised process makes sure that the patient is

educated and informed about the procedure, the healing process and proper care of scars to make the best choices," explains Dr. Balogh.

Patients find comfort in the trust they develop while working with the renowned and highly touted cosmetic surgeon, Dr. Balogh. The experienced surgeon will work diligently to ensure that any visible scarring from the procedure is minimal and as light as possible. Her practice offers a level of care and patient satisfaction that can only be achieved through one-on-one, patient-to-doctor dialogue.

### Other beauty treatments and lifting

In addition to plastic and surgical procedures, Dr. Balogh's signature beauty treatments include skin and wrinkle therapy with peeling, medical needling, lifting, hyaluronic fillers (for wrinkles and lips), Botox for wrinkles and migraine, PRP (vampire lifting) and Aptos-lifting.
